

THIN MULTIPLES TRIAD

MADE BY BY JUNIPER

The THIN Multiples Triad arranges three light segments in a linear trio for brighter illumination while maintaining a slender profile. Magnetic connections into precision-machined solid brass hardware enable the 1/2-inch light segments to fully rotate for direct and indirect lighting solutions.

Dimensions

Available in multiples of 24" and 36" segments.

Material Options

Brushed brass, Satin Nickel, Black Oxide, Bronze
