

AVA TABLE LAMP

MADE BY BY TOM FAULKNER

Incorporating a slice of ingenious visual trickery, our AVA table lamp is a genuine showstopper. Featuring two tetrahedrons balanced on top of each other – their centre of gravity precisely positioned to create a strong and stable platform – the metal base appears as one piece that has been twisted in the middle. This simple but intriguing geometrical form catches the eye and provides a sense of subtle drama, without overpowering the rest of the room. The AVA table lamp is available in a selection of our standard and specialist finishes and comes in a variety of different shade colours.
