

AW 400L

BY ONE A

The AW400 lamp is a wall mounted lamp. LEDs inside the alabaster tube, ensures that a homogeneous and continuous light is emitted throughout the stone.

The slender plinth, made from either aluminium or brass, is rounded towards the alabaster thereby embracing the material with a seemingly minimal touch.

The assembly method lends itself to creativity, as the lamp can be positioned in different directions.

Dimensions

15.8"H x 1.57"W x 4.72"D

Material Options
