

CONSOLE TABLE

MADE BY BY KARAKTER

Tranquil and seductive, Aldo Bakker's Console Table floats exquisitely between sculpture and furniture. It depicts the simplest concept of a table: two columns and a surface. The legs are an elongation of the line created by the tabletop. The tabletop and the base of the legs have the same width, making them equally important to the design. The distance between the legs is not fixed, but can be changed as preferred, adding to the sculptural quality of this piece.
