

FOLD ROUND

BY SKLO

The signature glass elements of the Fold collection are cylinders of handblown Czech glass with a gentle, intentional "fold". Approximately 2"/50mm in diameter, the cylinders are sculpted by hand, each slightly different. For the Fold Round Chandeliers, lit glass Folds in three sizes/lengths are suspended on fabric-wrapped electrical cords from the circumference of a circular canopy. Available in three different sizes. Cord lengths are field adjustable.
