

GAMMA

BY CREATORS OF OBJECTS

While playing around with vintage cameras from the 1970's, we were inspired by their flashcubes, a playful little form tragically designed for single use.

Using the disposable flash as a starting point, we scaled up and refined the shape to create the GAMMA table.

This seamless table introduces a beautiful splash of light-diffusing colour to interior spaces. Our take on the classic cube combines a slight upward taper with crisp exterior edges and rounded interior corners that focus and reflect light. Available in three sizes, it's perfect as a side table or for creating group arrangements.
