

LURE SCONCE

MADE BY BY PELLE

Lure transforms a flower's transient beauty into a lasting light. In this fixture, a cast paper flower is spotlighted by a suspended LED light source. Held by a slender brass arc, the light shines brightly on a blossom built of hand-sculpted petals, displaying texture, structure, and delicacy. The white flower reflects light, providing a source of soft illumination.

The Lure Sconce uses cast cotton paper flowers that are sculpted by hand in the Pelle studio. Each blossom's petals are individually shaped and each Lure blossom is unique. Unlike wood-based paper, the cotton paper is archival in quality, extremely durable, and has been known to last for more than a hundred years.
