

PRINCIPAL CHAIR

BY KARAKTER

One of the last living mid-century Scandinavian design pioneers and a female pioneer in the field of architecture in her time, Bodil Kjær, conceived her Principal series in 1961 as part of an architectural exploration of interior solutions for modern living, called Elements of Architecture. Comprising a dining table and an upholstered dining chair, the Principal series epitomizes Kjær's forward-thinking cosmopolitan outlook and modernistic design language that slips fluidly into contemporary interior.
