

PRINCIPLE DINING TABLE

MADE BY BY KARAKTER

The solid wood dining table boasts a clarified form, repeating a simple angle throughout table legs and ends of the table top, while the dining chair with its circular seat and gently rounded backrest, beautifully upholstered, adds a softness to the clear, unfussed geometry, an invitation to linger.

Bodil Kjær, conceived her Principal series in 1961 as part of an architectural exploration of interior solutions for modern living, called Elements of Architecture.
