

## SOFTSPOT

**MADE BY BY GIOPATO & COOMBES**

The minimal exterior hides an internal architecture manufactured with clockwork precision for extreme LED cooling. The SoftSpot LED warm white bulb emits 75% light downwards for focused direct lighting and 25% upwards for low indirect lighting. The result is a soft interior atmosphere from a pure form. The SoftSpot lamp is 100% designed and custom-made from the ceiling plate to the LED bulb. The single internal wheel component fuses together heat-sink, socket and cable block functions whilst allowing light to pass through.

### **Dimensions**

3" x H21.5" + drop

### **Material Options**

Brushed Bronze, Brushed Nickel,  
Blackened Brass, Brushed Brass,  
Polished Nickel  
White or black cable

### **Lamping**

Power Input  
110-120V 50-60Hz

Light Source  
Proprietary Softspot  
75 LED, 9W, 380 Lumens, 2700K warm  
white. CRI>95. 75% downwards and  
25% upwards

Dimming Standard  
Phase Cut 1-10 Volt
